Making a Difference

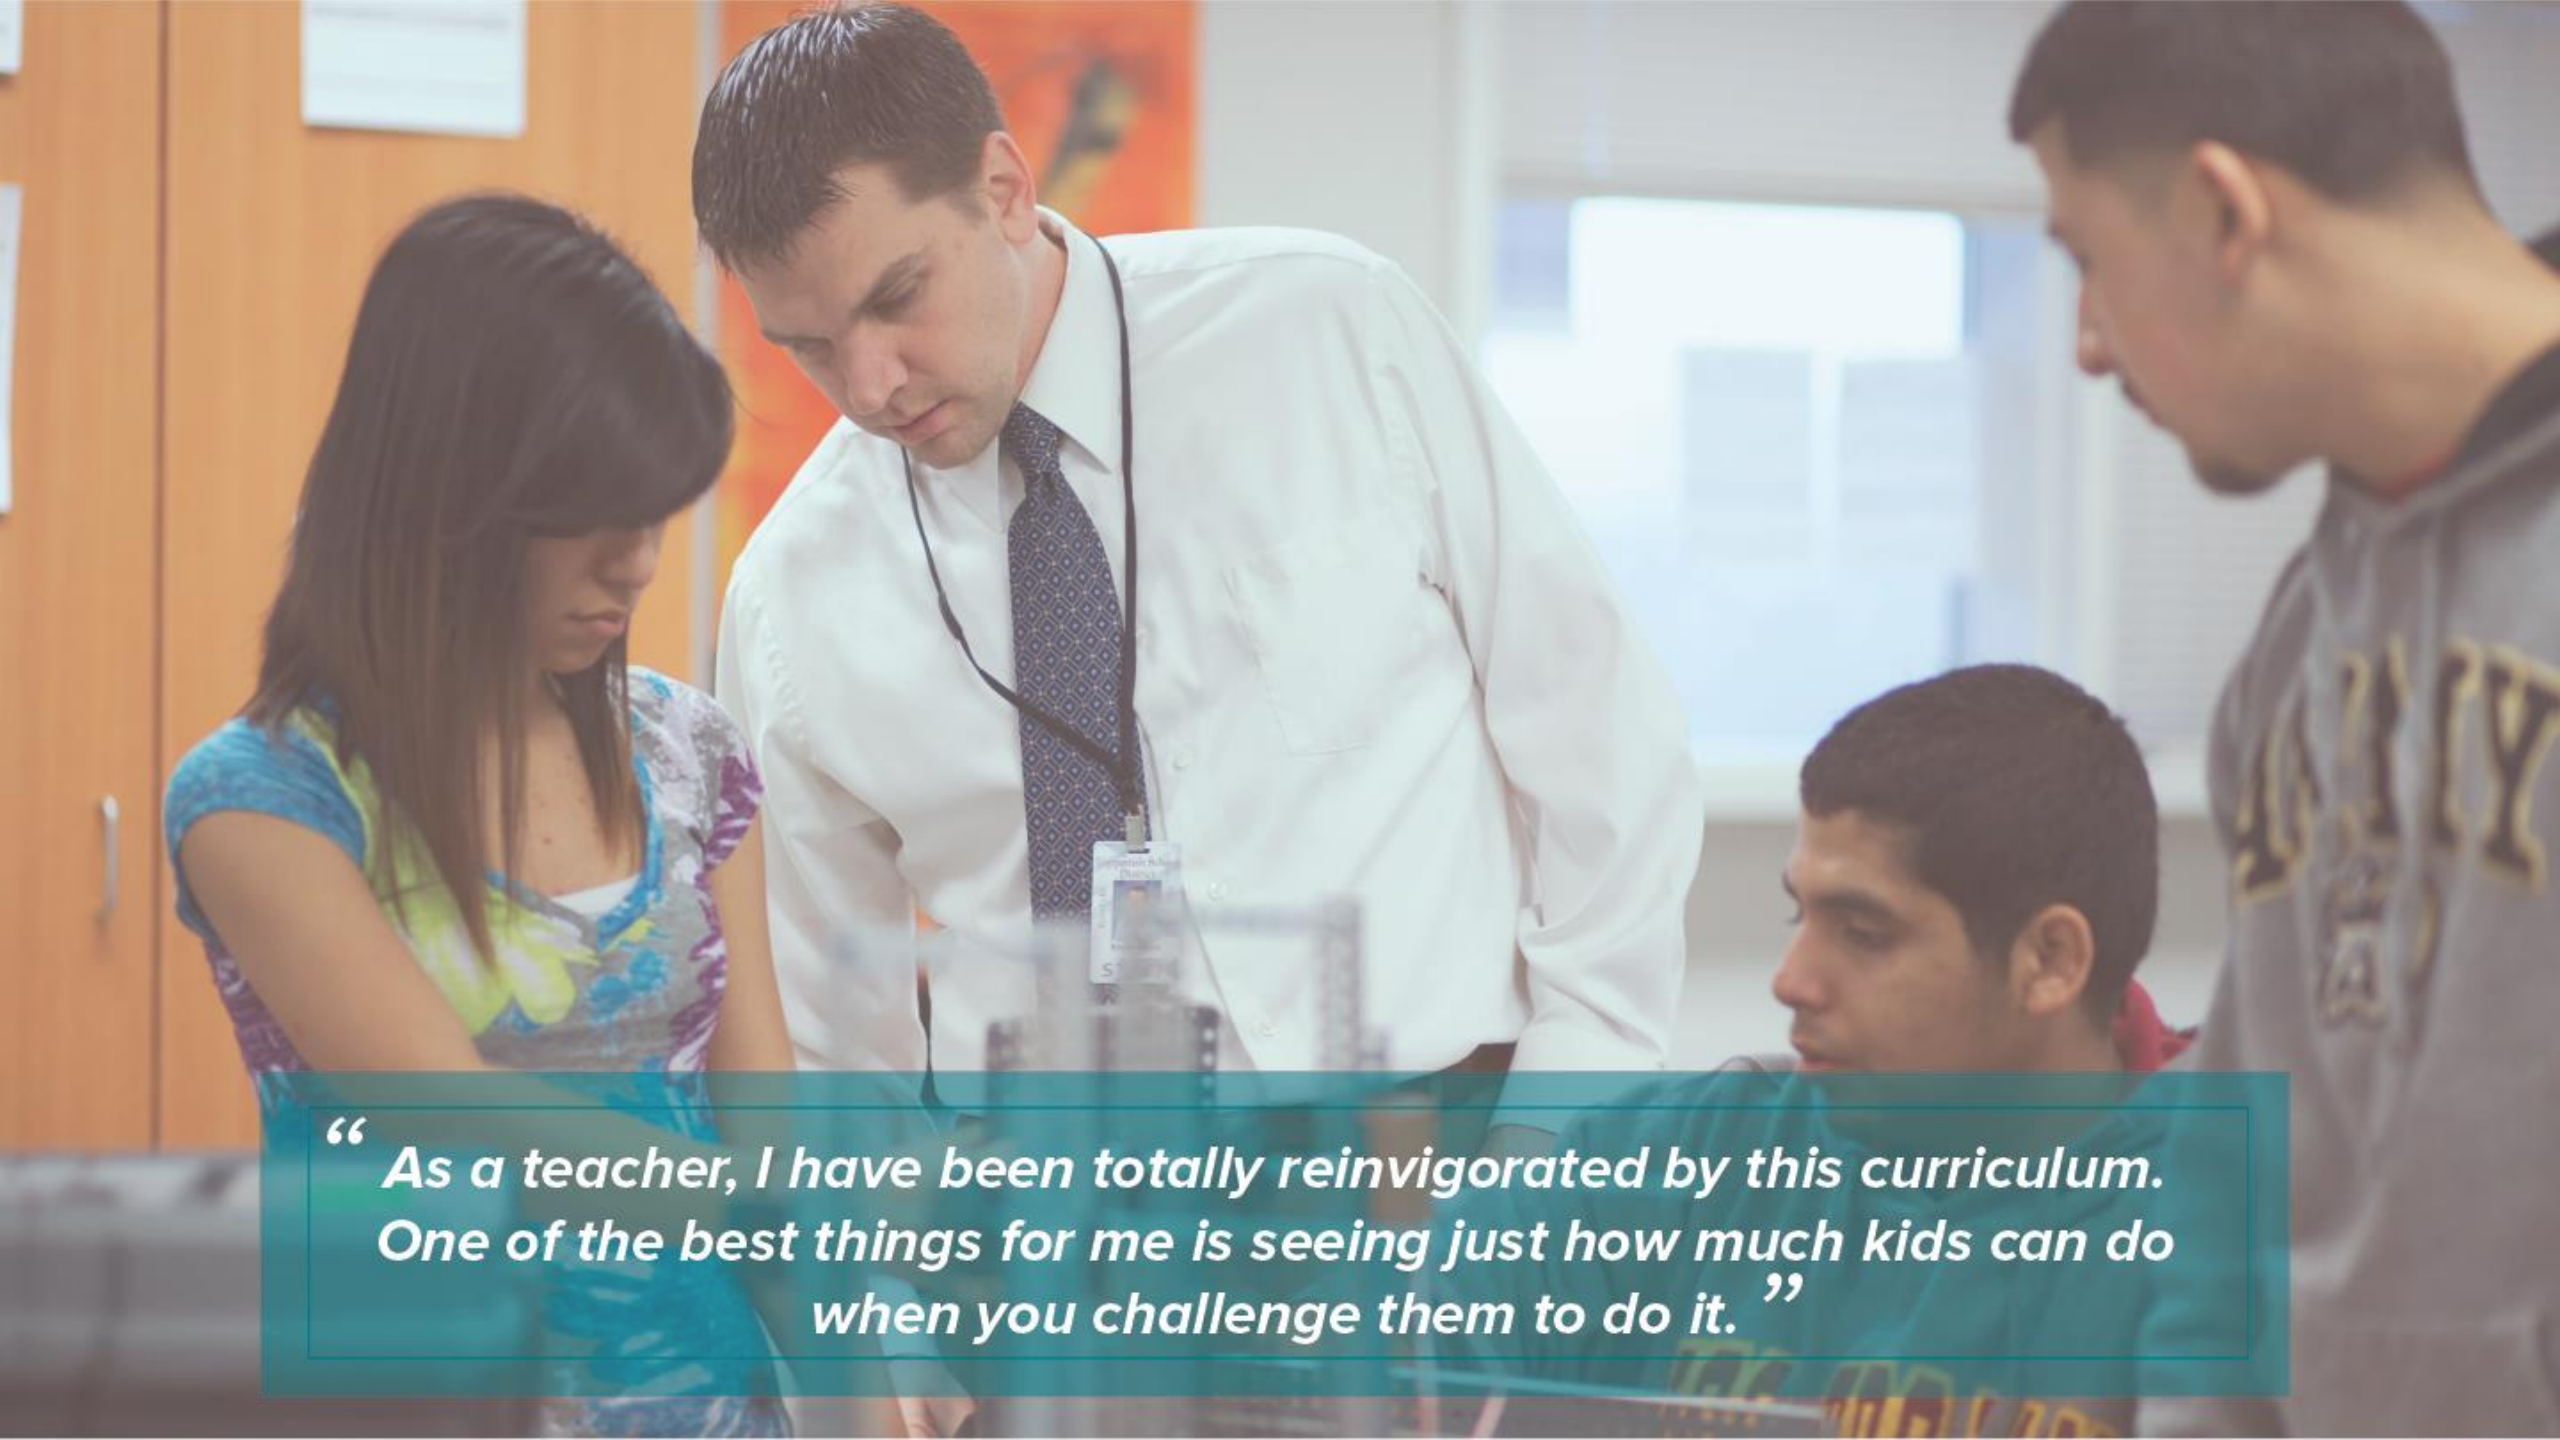

Professional Development

“ We forget what it's like to be a student. And here at this training, we're really doing the activities and the experiments and the projects that our students will be doing in the classroom. ”

“ I think it really helps remind you that students can become frustrated and how important it is for us, as teachers, to really be patient and help them through this process of learning and exploring and understanding. ”

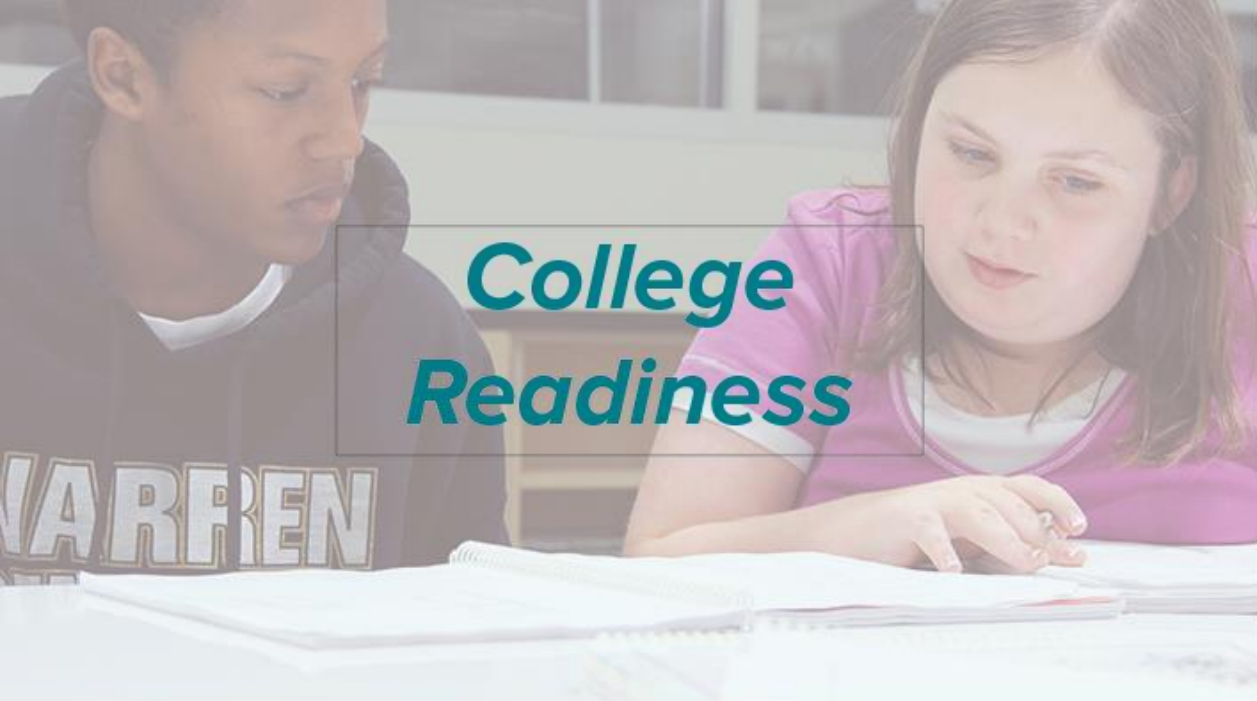

“As a teacher, I have been totally reinvigorated by this curriculum. One of the best things for me is seeing just how much kids can do when you challenge them to do it.”

What We Offer

**College
Readiness**

AP + PLTW

**STEM
Premier**

**Career
Opportunities**

Thank You
